20/12/2023, 09:31 **František Fuka:**

Please explain what I am doing. I don't want to "withdraw" anything yet...?

20/12/2023, 09:32 **+44 7908 214864:**

Congratulations, you have activated the mining pool

20/12/2023, 09:34 **+44 7908 214864:**

When you generate income, you can choose to withdraw it

20/12/2023, 09:35 **+44 7908 214864:**

Do you have USDT in your Binance account?

20/12/2023, 09:35 **František Fuka:**

?? No, I don't have Binance account

20/12/2023, 09:36 **František Fuka:**

I've only used Kraken in the past

20/12/2023, 09:37 **+44 7908 214864:**

You can try to save some USDT and learn about the mining pool plan first. Now that many users are participating, now is the best time

20/12/2023, 09:37 **František Fuka:**

OK, where can I read about this?

20/12/2023, 09:38 **+44 7908 214864:**

The pool calculates returns based on the USDT in your trust wallet. This is similar to calculating interest on a bank savings account. For example, if you have 2200 USDT in your wallet, you will earn  $2200 \times 1\% = 22$  USDT every day. If you have 6000 USDT, you can earn  $6000 \times 2\% = 120$  USDT every day. The money is at your disposal. If you have 10,000 USDT, your daily profit is 300 USDT

20/12/2023, 09:38 **František Fuka:**

OK, where can I read more about this?

Well you said "you can learn about the mining pool plan", so I am asking where can I learn more?

20/12/2023, 09:43 +44 7908 214864:

DeFi-USDT liquidity mining: Mining is performed based on the amount of USDT held by the user. It is not a transaction and does not require users to buy up or down. After a user registers for the Binanc DeFi-USDT mining pool, the system will generate mining data calculations based on the amount of USDT you hold. If you hold less than 1,000 USDT, you will not be able to generate mining computing power, and you will not be able to mine on the blockchain!
